

MADE TO TRUST
MADE TO CHALLENGE

SC90782

SATA chisels and punches combine the strength that professionals need with unparalleled versatility to make the perfect sets of tools for carving, wood turning, engraving, Mortising or a variety of other applications. The single-piece forged steel bodies of every SATA Chisel and punch are perfect for wood turning on a lathe or cutting dovetails or other joints. If you want to punch through wood, leather or metal pieces, rely on the strength of SATA. Our innovative sharpening techniques ensure that every set meets professional standards of quality. The world needs more doers, and at SATA, we're devoted to putting the best tools into the hands of the best doers.

FEATURES

- Powder coated, single piece forged steel for maximum strength and corrosion resistance
- Powder coated metal for long lasting durability
